

The background of the cover is a detailed, high-angle photograph of the interior of a particle detector, likely the ATLAS detector at CERN. The structure is a complex, multi-layered cylinder made of dark, metallic components. At the center of the cylinder, a bright, glowing orange-yellow point of light represents a particle collision. From this central point, numerous thin, orange-yellow lines radiate outwards, tracing the paths of particles produced in the collision. The overall lighting is dark blue, with the central collision point providing a strong contrast.
